

MGM'S College of Engineering, Nanded

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

“AI-Powered Code Reviewer and Quality Assistant”

Name of Student: Mr. Shrikrushna Uday Gandhewar

Name of the Guide: Ms. Muklta Shelke

Academic Year: 2025- 2026

The AI-Powered Code Reviewer and Quality Assistant is an AI-driven software quality platform that automates code analysis, documentation generation, and maintainability evaluation for Python and Java applications. It helps developers improve code quality through intelligent validation, complexity analysis, and optimization recommendations. The system reduces manual review effort and promotes better software development practices.

Conclusion: The AI-Powered Code Reviewer and Quality Assistant successfully combines Artificial Intelligence and static code analysis to automate documentation generation, validation, complexity analysis, and software quality assessment for Python and Java applications. The system improves code maintainability, readability, and development efficiency while reducing the effort required for manual code reviews.
